

**CLAWGEAR**

# DEAR VALUED CUSTOMER,

It hardly seems 12 months since we were last preparing the CLAWGEAR® workbook. In that time there have been some very significant changes. A key part of this change was the re-structure of our organisation. As a relatively young company, we took this opportunity to review how we approach our work, deliver our products and become more efficient at going from concept to you, our customer.

Going forward into 2024 we have significantly increased production capacity for all our garment products and we are well on our way implementing the same updates to our equipment department. Meaning a more stable supply of products.

For CLAWGEAR® Clothing & Equipment the team are extremely excited to offer several new products that have been requested by you for a long time.

CLAWGEAR® firearms products are carried out from business unit CLAWGEAR® DEFENCE. Our goal is to meet your needs by providing the right tools to complete your missions. For us, it is not only a job, it is an attitude of commitment.

We are pleased to welcome you to the new edition of the CLAWGEAR® workbook and to share some highlights of our work.

Sincerely,  
Your CLAWGEAR® Team

# WHAT IS CLAWGEAR?

**CLAWGEAR® exists to bring innovative solutions that solve problems for our professional users.**

By working closely with military, law enforcement, and other security services we strive to understand their specific needs. This means the products we develop begin life with a specific problem to solve.

Our vendors use only the highest quality materials from recognized brands that meet internationally recognized

standards for quality and performance. Our in-house development and prototyping create a proof of concept samples that are extensively tested and revised to ensure product integrity. Only when testing has been completed and signed off, is the product released for manufacturing at our specialized factories.

## EXPLANATION OF WORKBOOK LAYOUT

The CLAWGEAR® brand workbook is organized by the market segments we serve. Along the open edge, you will find sections separated by colored tabs.

		
GARMENTS BUSINESS UNIT	EQUIPMENT BUSINESS UNIT	DEFENCE BUSINESS UNIT
<b>FUNCTIONAL CLOTHING</b>	<b>GEAR &amp; ACCESSORIES</b>	<b>GUNPARTS &amp; ATTACHMENTS</b>
In the brown section you will find products from our Garment Department, which includes our battle dress uniform (BDU) and functional clothing products. These are offered in various colors and prints either as stock items or special make-up projects. For the first time, we are also offering "female fit" as a special make-up on selected BDU styles.	In the tan section of our Equipment Department, you will find a range of items covering individual "on-the-man" products such as pouches, belts, and other innovative storage options. In this section, we are also several new products for 2023 in the form of ballistic protection carriers. All our equipment products are produced using the highest quality materials.	The engineers in our Firearms Department have curated a number of gun parts and attachments for many popular weapons, including Steyr AUG and the AR platform. All of these products can be found in the light blue DEFENCE section.

## QUALITY MANAGEMENT ACCORDING TO AQAP2110

For CLAWGEAR® products and projects supplied to the North Atlantic Treaty Organization (NATO) or under a NATO contract, the Allied Quality Assurance Publication AQAP-2110 shall provide the requirements for the highest quality standards during the whole development process, and production. We see compliance with these standards as the foundation for the high quality of our products.

## GENERAL QUALITY MANAGEMENT ACCORDING TO ISO 9001:2015

Since 2018 all brands within the TMH TRADING GmbH portfolio have followed the Quality Management Systems requirements of ISO 9001:2015. The market segments served by the products provided by the CLAWGEAR® brand benefit from ISO9001:2015 registration by ensuring products meet customer, statutory and regulatory requirements. In addition, the quality management system strives to enhance customer satisfaction through effective product feedback and corrective actions. With us, quality is not only monitored, in fact but it is also developed.

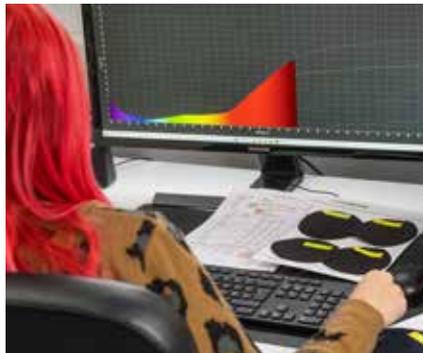

# PRODUCT DEVELOPMENT

All product development for CLAWGEAR® products occurs in Europe from our development centers. New product concepts are conceived, designed, and prototyped within our own product labs. Prototypes are tested for suitability for end use and desired performance before handing over to our production team.

During this period, designs are critiqued against the design intent and if we have the desired or expected output from the product being developed. At the same time, we are working with our supply chain to achieve the required parameters in our materials.

## COLOUR INTEGRITY

A critical component of our product development is insuring that colors and shades are not only correct but are also durable for the practical lifetime of the garment. Our in-house quality department verifies colors to recognized international standards using visual and photo spectrometry methods.

## NEAR INFRARED (NIR)

The measurement and control of near infrared wavelengths provide a level of tactical benefit for both attack and defense during military operations. For many years, the ability to remain undetected in the near infrared spectrum has been a requirement for military clothing and equipment.

During times of limited visibility, these wavelengths can be exploited using night vision equipment to detect people or gear. This is especially so when materials and surfaces exhibit values outside the normal spectral signature of vegetation.

At CLAWGEAR® we have worked closely with all our vendors to insure the materials intended for military and law enforcement meet a recognized standard for spectral reflectance. In addition, all our materials are assessed using our in-house spectrometer.

## CORPORATE & SOCIAL RESPONSIBILITY

### Materials Compliance

Our goal is to only use a material that the requirements defined under EU Law for REACH. In addition, many of our vendors comply with the OEKO-TEX® STANDARD 100 for harmful substances.

### Manufacturing

All our EU production facilities follow strict European Union legislation for workers' rights. Those facilities outside the EU are assessed through independent third-party organizations such as the Fairwear Foundation.

### Animal Welfare

The use of animal-based materials in some of our products is strictly governed by international global standards. The Merino wool we use is mulesing-free and from sustainable sources.

# ADVANCED TEXTILES

CLAWGEAR® use a number of enabling technologies in the manufacture of our products. To help identify the products that incorporate these technologies, the following icons are used:

## MERINO WOOL

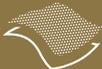

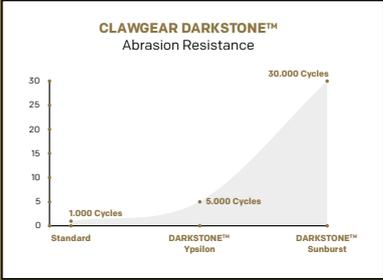

We use Merino wool as either 100% of the material content or as blends for improved performance. All our wool is sourced from suppliers that follow the Responsible Wool Standard (RWS). This standard protects animal welfare and promotes responsible land management.

## ATS

CLAWGEAR® Advanced Textile Solution (ATS) is a lightweight textile with mechanical stretch properties. It is made using the latest T420HT high-tenacity fiber from CORDURA®. The textiles in the ATS category exhibit superior strength, lower moisture pick up, faster drying, and are more breathable and extremely lightweight.

## DARKSTONE™

Products with the DARKSTONE™ icon have an extremely abrasion-resistant treatment applied to them. The treatment has minimal effect on the textile hand but improves abrasion resistance by a factor of up to thirty depending on the version of the treatment. DARKSTONE™ is tested to DIN EN530. DARKSTONE™ is REACH compliant.

Treatment	Cycles
Standard	1,000
DARKSTONE™ Ypsilon	5,000
DARKSTONE™ Sunburst	30,000

## AGNI™

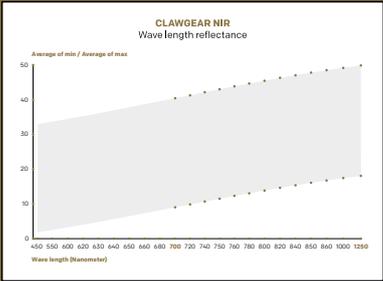

Products carrying the AGNI™ icon have been tested and certified by independent laboratories as being flame retardants. These materials are tested to EN ISO 15025 means no molten debris and afterglow & and the flame is less than two seconds. AGNI™ materials also exhibit superior color fastness for long service life and high air permeability for user comfort.

## RAPTOR

CLAWGEAR® Raptor materials are a collection of functional textiles primarily for use in windproof, waterproof, and breathable clothing applications. The specific composition of the laminates depends on end-user requirements. We have within our portfolio laminates based on bi-component ePTFE, Polyester, and Polyurethane membranes.

## NIR

Products with this logo have been tested and validated to military standards for near infrared reflectance. By reducing the NIR signature the probability of detection by low-light devices is significantly reduced.

# MOBILITY SMOCK

## PRODUCT CONCEPT

The Mobility Smock is a modern take on the classic combat smock. It eschews the traditional cut and fit of the traditional smock by integrating aspects of modern technical outerwear while catering for the needs of the modern war fighter or law enforcement officer.

The four large capacity external pockets are of a bellow construction and feature a "lie flat" design when not in use. This creates a very tidy and low-profile visual signature.

The external pockets are further supplemented with two arm mounted pockets with loop attachment points. In addition, there are a further two internal mesh pockets and an external, large capacity "poachers" pocket.

The Mobility Smock design uses a drop tail construction with a higher cut front. The drop tail provides lower back coverage while seated while the high cut front provides ease of access when entering or exiting vehicles and frees upper legs for tasks such as ladder climbing.

## TECHNICAL FEATURES

- Drop tail construction
- 4 Large capacity storage pockets
- 2 Sleeve mounted organiser pockets
- 2 internal mesh pockets
- 1 external poachers pocket
- Multi adjustable, "Clearview" helmet compatible hood
- Draw cord waist and hem
- Concealed button and double back closure on pockets
- Zipper and concealed button centre front closure

## ENABLING TECHNOLOGIES

# FIELD SHIRT

## CLEAN

### PRODUCT CONCEPT

The Field Shirt LT design has been reduced to maximum! Created for tropical and jungle warfare theaters of operation, all ancillary features have been removed. The CLAWGEAR® ATS textile is fast dry, low moisture pickup and highly breathable – ideal for tropical environments.

In its "CLEAN" form, the product has only a compass pocket on the left chest location and two sleeve mounted pockets for personal equipment.

The reduced feature set on the chest front make it the ideal product for use with tropical chest rigs and belt order.

### TECHNICAL FEATURES

- Extended hem for waistband containment
- Compass pocket with attachment beackets
- Sleeve pockets with loop ID patch
- Mandarin collar
- Extended cuff adjustment
- Off shoulder seams for reduced rub
- Mesh vented rear yoke
- ID Velcro tabs on chest

### ENABLING TECHNOLOGIES

- CLAWGEAR® ATS™ - Low moisture pick up, fast dry & high breathability
- Mechanical Stretch
- YKK zipper
- NIR Suppressed
- Genuine MULTICAM® Pattern
- Permethrin anti-vector available on request\*

# FIELD SHIRT

## ATAP

### PRODUCT CONCEPT

The Field Shirt LT "ATAP" variant is not only a traditional jungle warfare design it can also be used as tropical garrison wear due to its lightweight and high breathability.

Based around the Field shirt LT the main difference is the chest pocket configuration. This follows a traditional double slanted pockets design with loop attachments for name, service number or other identifiers.

The chest pockets are of bellows construction and an additional compass pocket is incorporated on the left hand side.

### TECHNICAL FEATURES

- Extended hem for waistband containment
- Compass pocket with attachment beackets
- Sleeve pockets with loop ID patch
- Mandarin collar
- Extended cuff adjustment
- Off shoulder seams for reduced rub
- Mesh vented rear yoke
- ID Velcro tabs on chest

### ENABLING TECHNOLOGIES

# COMBAT PANTS LT

## PRODUCT CONCEPT

The Combat Pants LT are the matching product for both the LT CLEAN and ATAP lightweight combat shirts. The cargo pockets with bellows construction incorporate a mesh base to allow fast drainage of water following riverine or water based tasks.

Draw cord waist allows fine adjustment without requiring a belt which may contribute to injury in a tropical environment. Like wise drawcord ankles impede the ingress of insects and other wild life.

Hand pockets are also included in the design and feature zipper closures, again to impede the ingress of wildlife.

## TECHNICAL FEATURES

- Extended hem for waistband containment
- Bellows cargo pockets with button and Velcro closure
- Mesh bottomed pockets for fast water drainage
- Drawcord closure at ankle
- Drawcord adjustment at waist for belt rub mitigation
- Button and webbing waist closure
- Two hand pockets with pocket knife reinforcement
- Equipment loops at rear yolk

## ENABLING TECHNOLOGIES

- CLAWGEAR® ATS™ - Low moisture pick up, fast dry & high breathability
- Mechanical Stretch
- YKK zipper
- NIR Suppressed
- Genuine MULTICAM® Pattern
- Permethrin anti-vector available on request\*
- Weight: 525g

# MP GILET

## MULTI PURPOSE VEST

### PRODUCT CONCEPT

The MP Gilet is a multi purpose vest for deployed or garrison use. It is an effective windcheater offering protection to the core body of the wearer. In addition it reduces wearer discomfort from equipment and plate carrier rub.

When combined with an under armour shirt it brings an effective uniformity by covering up the plain colours of the torso fabric of all UBACS. This can be important when strict dress code is a requirement.

The rear yoke section features a ventilation slot for enhanced comfort. The product also features chest pockets parallel with the centre front button closure – large enough for aide memoire or notebook.

### TECHNICAL FEATURES

- High durability nylon construction with 4-way stretch
- Ergonomic fitted design
- Napoleon style zippered chest pockets
- Canadian slotted buttons with placket cover
- ID Velcro tabs on chest

### ENABLING TECHNOLOGIES

- Polyamide construction
- 4-Way Stretch
- YKK zipper
- NIR Suppressed
- Genuine MULTICAM® Pattern

 CLAWGEAR

## **CLAWGEAR® RAIDER LINE FEMALE FIT (FF)**

Designed specifically for the female form, the RAIDER LINE FEMALE FIT is exactly that. Our RAIDER ATS products re-engineered for the female form. Females currently accounting for upward of 20% of both combined regular force and reserve defence force personnel. Females also currently make upward of 35% of law enforcement officers in a wide variety of law enforcement branches. It made sense for us to recognise this and introduce this product line. The line is based across three styles and uses the same materials and technology used in the established RAIDER line.

## COMBAT SHIRT

### PRODUCT CONCEPT

The CLAWGEAR® Combat Shirt (FF) is a lightweight, fast-drying product for use by military and law enforcement professionals. Designed to be worn as a stand-alone item or below ballistic protection carriers or stab-resistant vests. The ergonomic design and low-profile seams provide exceptional next-to-skin comfort and freedom of movement while the highly breathable textile supports evaporative cooling in higher temperatures. Careful consideration has been given to colour mapping to insure that camouflage patterns and colours provide the maximum level of coverage.

### TECHNICAL FEATURES

- Mandarin collar with YKK reverse coil zipper closure
- Extended camouflage front and rear yoke
- Low profile upper arm pockets with zipper closure and becket utility loops
- Unique IFF VELCRO® patch on each sleeve
- Ergonomic pre-curved sleeve construction
- Adjustable cuffs with Velcro® hook and loop fastening
- Provision for forearm and elbow protection
- Critical load-bearing areas bar-tacked

### KEY FEATURES

- CLAWGEAR ATS 185GSM POLYAMIDE/COTTON ripstop with mechanical stretch

## FIELD SHIRT

### PRODUCT CONCEPT

The CLAWGEAR® ATS Raider Field Shirt (FF) is a next-generation battle dress field shirt. It takes the DNA and learning from the original CLAWGEAR® field shirt and brings it to a new level. The new design is lighter, faster drying, more breathable, and provides an extended range of movement due to the use of our ATS technology. This style is designed with extended deployment and multi-role capability. The ergonomic design includes mesh venting in the front pockets and rear darts. The provision for belt-mounted side arms has been included using zippered access. Careful consideration has been given to the colour mapping to insure that camouflage patterns and colours do not contrast.

### TECHNICAL FEATURES

- Mandarin collar with securing tab
- Bellows upper arm pockets with zipper closure and becket utility loops
- Chest Rig/Plate Carrier Accessible Chest Pockets

## COMBAT PANT

### PRODUCT CONCEPT

The CLAWGEAR® Raider Field Pants (FF) are the lightest, most durable pants for extended deployment tasks. The ergonomic design and CLAWGEAR® ATS materials allow an unrestricted range of movement. The lightweight material significantly reduces water pick-up and offers faster drying times while DARKSTONE™ provides enhanced abrasion resistance and durability. The Raider pants feature eight pockets with the ability for personal equipment attachment. The product is constructed using twin-needle sewing for strength and flat-locked seams for comfort. Fine-tuning of fit is achievable through hook-and-loop waist tabs, external leg tabs with hook-and-loop adjustment and an internal knee locking cord.

### TECHNICAL FEATURES

- Rigger/Stable belt compatible comfort waistband
- Articulated knee area with CLAWGEAR® DARKSTONE™
- Internal Multi-Fit Knee Pad Sleeve
- Cargo pockets are bellows style with bonded flap closure and sitting position access
- Waist slash pockets feature reinforced edges
- Provision provided for external "Knee Caps" (available separately)
- Panel sewing is by twin needle and flat locked for durability and comfort

## ATS COMBAT PANT

### PRODUCT CONCEPT

The CLAWGEAR® Operator Combat Pants have been configured for light and fast, short-duration tasks. They feature a lower profile design and the CLAWGEAR® ATS materials allow an unrestricted range of movement. The lightweight material significantly reduces water pick-up and offers faster drying times while DARKSTONE™ provides enhanced abrasion resistance and durability.

The Operator Combat Pants feature four pockets with the ability for personal equipment attachment. The lower leg also has the provision for the attachment of items such as IR beacons or tourniquets depending on task or unit procedures. The product is constructed using twin-needle sewing with all seams flat-locked for comfort.

Fine-tuning of fit is achievable through hook-and-loop waist tabs, external leg tabs with hook-and-loop adjustment, and an internal knee locking cord.

### TECHNICAL FEATURES

## COMBAT PANTS

### PRODUCT CONCEPT

The CLAWGEAR® Raider Field Pants are the lightest, most durable pants for extended deployment tasks. The ergonomic design and CLAWGEAR® ATS materials allow an unrestricted range of movement. The lightweight material significantly reduces water pick-up and offers faster drying times while DARKSTONE™ provides enhanced abrasion resistance and durability

The Raider pants feature eight pockets with the ability for personal equipment attachment. The product is constructed using twin-needle sewing for strength and flat-locked seams for comfort.

Fine-tuning of fit is achievable through hook-and-loop waist tabs, external leg tabs with hook-and-loop adjustment, and an internal knee locking cord.

### TECHNICAL FEATURES

- Rigger/Stable belt compatible comfort waistband
- Articulated knee area with CLAWGEAR® DARKSTONE™
- Internal Multi-Fit Knee Pad Sleeve
- Cargo pockets are bellows style with bonded flap closure and sitting position access
- Waist slash pockets feature reinforced edges
- Adjustable Ankle Hem with CLAWGEAR® DARKSTONE™
- Provision provided for external "Knee Caps" (available separately)
- Panel sewing is by double needled and flat-locked for durability and comfort

### KEY FEATURES

- CLAWGEAR® ATS 185GSM POLYAMIDE/COTTON ripstop with mechanical stretch
- Sizes – See Size Chart on the last page.

# OVERWHITE JACKET

## PRODUCT CONCEPT

The CLAWGEAR® Overwhite jacket is designed to provide visual concealment in alpine or transition terrain. The product is worn over primary, operational equipment while providing access via pass through pocket.

The lightweight and windproof material is abrasion resistant and is constructed using a 70D rip stop.

The product matches with the Overwhite Pants 124792 allowing upper and lower body to achieve a different visual signature. This is especially useful at snowline transitions and mixed alpine terrain.

Please note that this style is oversized.

## TECHNICAL FEATURES

- Centre front zipper with storm flap
- Two pass through chest pockets
- Under arm ventilation zips
- Helmet compatible hood with multi point adjustment
- Waist drawcord adjustment

## ENABLING TECHNOLOGIES

- 70D Polyamide
- Windproof rip stop weave
- CO Water repellent treatment
- YKK zippers
- Weight: 260g

## MATERIAL

- PA (Polyamide)

# MUFF

## HAND WARMER

### PRODUCT CONCEPT

The "Muff" is for use in non-tactical, cold weather environments on land, at sea or in the air. With the ability to hang free or attached to standard molle systems, the Muff is a multi textile, multi insulation solution that sets new standards in comfort.

The outer construction uses CORDURA® throughout, while the multi layer insulation uses high performance continuous filament fibres and a fleece lining.

Fixing points are available allowing flexibility for the user to fix to their personal rig or equipment. The product also features a large pocket for storage of personal items or where procedures allow air activated heat pads for extra comfort.

### TECHNICAL FEATURES

- Molle attachment points
- Fleece lined for warmth and comfort
- Zippered pocket for storage or heating pads
- High durability outer cuffs with cord lock adjustment
- Inner ribbed "para" cuffs provide easy access and draught exclusion

## INSULATED BLANKET (WIB)

### PRODUCT CONCEPT

Conceived as a packable, lightweight, fast drying emergency insulation system, the Woobie Insulated Blanket (WIB) has been a staple of militaries around the world for decades.

Created to be a stand alone item or used in conjunction with the CLAWGEAR® Bivouac Sheet, the WIB is simultaneously a little bit comfort and a potential life saver. Sandwiched between high tenacity polyamide rip stop fabric is a thermal insulation layer that uses continuous filament hollow core fibres for exceptional warmth to weight. All materials are DWR coated for reduced water pick up and fast drying. A classic re-invented.

### TECHNICAL FEATURES

- Large, 2 metre x 2 metre coverage
- Paracord anchor points

## GENERAL PURPOSE GAITERS

### PRODUCT CONCEPT

The CLAWGEAR® GP Gaiters are based on the tried and tested gaiter construction providing weather and dirt protection from the boot to the top of the lower leg.

The single-piece construction provides multi-layer protection. Upper leg tension and adjustment uses a captive strap with VELCRO® hook and loop fastening. The lower leg is attached using an instep buckle strap and forward lace hook.

### TECHNICAL FEATURES

- Highly abrasion-resistant CORDURA® construction
- Crampon and Technical Boot Compatible
- Adjustable instep strap and forward lace hook

### KEY FEATURES

- Extremely durable 500D CORDURA® textile
- VELCRO® hook & loop front closure

## LONG- & SHORT SLEEVE - SEAMLESS

### PRODUCT CONCEPT

The CLAWGEAR® Strata base layer is the first line of defense in cold weather and high-output activities. The “long body” design ensures skin cover is maintained in a full range of movement. The intimate blend of Polyamide for strength and natural Merino wool provides durability and comfort for the user. The inclusion of elastane allows an intimate fit for maximum wicking and breathability.

The shirt is available in long and short-sleeve configurations and features quick-drying, anti-microbial material with stretch for an unrestricted range of movement and comfort.

### TECHNICAL FEATURES

- Polyamide/Merino Wool/Elastane
- Long or short sleeve options
- Crew neck
- Seamless construction with 4-way stretch
- Quick drying & lightweight
- Mapped knit zones chest, underarms, and sleeves
- Double thickness hems
- CLAWGEAR® logo on chest

## LEGGINGS & BOXER - SEAMLESS

### PRODUCT CONCEPT

The CLAWGEAR® Strata Leggings and Boxer Briefs are performance base layers for use in cold environments.

The “three-quarter” length leggings avoid ride-up when worn with longer or four-season socks and boots thereby reducing pressure points from the material gathered.

The Boxer Briefs are trunk length with mapped zones at the crotch and pouch.

The products feature variable knit density and are quick-drying, and anti-microbial with stretch for an unrestricted range of movement and comfort.

### TECHNICAL FEATURES

- Polyamide/Merino Wool/Elastane
- Three-quarter length
- Seamless construction with 4-way stretch
- Quick drying & lightweight
- Mapped knit zones at the crotch, pouch & sides
- Double thickness waistband

## NECK GAITER & BEANIE – SEAMLESS

### PRODUCT CONCEPT

The CLAWGEAR® Strata Neck Gaiters are designed to provide lightweight, packable, cold-weather protection. The Strata Neck Gaiter in STANDARD length provides neck and lower jaw coverage while the EXTENDED option can be worn as a double layer in very cold environments or as a single layer providing coverage to eye level to the front and head crown to the rear.

The CLAWGEAR® Strata Beanie is a multi-environment, ultra-light beanie for four-season use. The construction provides excellent user comfort with a single-thickness, darted head covering with a low profile double thickness headband.

The stretch properties and lightweight provide limitless wearing options depending on the task, and tactical requirements, and with minimal storage and weight burden.

### TECHNICAL FEATURES

- Polyamide/Merino Wool/Elastane
- Seamless tube construction
- Double-thickness tube ends
- Knitted CLAWGEAR® logo front & centre
- Knitted care instructions

## PLATE CARRIER

### PRODUCT CONCEPT

The CLAWGEAR® Plate Carriers have been designed to allow quick and easy adaptation for any mission profile thanks to multiple interchangeable parts and accessories. All parts of the 3 plate carriers are interchangeable.

The pre-configured Operator Plate Carrier is assembled with a classic, lightweight laser-cut front and rear panel which contain the plate bags. The Operator Placard is a classic PALS/MOLLE front panel that allows the mounting of various pouches. The Placard is attached to the plate carrier with commonly known QASM buckles. Once detached the Placard can be converted into a chest rig with the CLAWGEAR® Chest Rig Adapter.

The double-sided 3-inch TEGRIS® Operator cummerbunds are designed to increase user mobility while maintaining stability and stiffness common on larger and heavier cummerbunds. The cummerbunds QR (Quick Release) buckles are detachable to give the user more modularity during reconfiguration. The shoulder straps can also be fitted with an optional QR module as shown or a Uni Loop to user preference.

The plate carrier is designed as "one size fits most", therefore it can utilize the most popular stand-alone ballistic plates. Furthermore, it can be upgraded with dedicated foam pads to increase user comfort. Due to utilizing the latest materials and technology, the plate carrier provides high durability and comfort while maintaining a low weight.

### TECHNICAL FEATURES

- Lightweight and durable
- One size fits most (SAPI Small, SAPI Medium, 10"x12")
- Easy and quick interchangeable plate carrier parts
- Double-sided lightweight, and stiff cummerbunds
- VELCRO® panel for ID patch
- Special CLAWGEAR®Uniloop cutouts for cable management
- Multiple and adjustable placard mounting options
- Mission profile adaptive

# PROTECTOR

## PLATE CARRIER

### PRODUCT CONCEPT

The pre-configured Protector Plate Carrier set is constructed with an integrated admin pocket on the front panel and a snag-free, low-profile rear panel. The Protector plate carrier utilizes the same Operator placard used on the Operator Plate Carrier set to mount various pouches. The placard can also be adapted to form a chest rig in conjunction with the CLAWGEAR® Chest Rig Adapter.

The low-profile Protector elastic cummerbunds are designed to increase the user's mobility and comfort due to their ability to stretch. The addition of optional Protector cummerbund inserts allows the user a quick and easy expanding storage solution. The inserts can hold a single or double rifle magazine, flashbang, medium-sized radio, or any other items similar in size. The content is secured with an adjustable/removable shock cord retainer. The Inserts can be rotated 180 degrees vertically, which means that the contents can be accessed either from the top or from the bottom. The shoulder straps are low-profile and preconfigured with the option of modifying with QR buckle adapters which can be bought separately.

The plate carrier is designed as "one size fits most" therefore it can carry the most popular stand-alone ballistic plates. Furthermore, it can be upgraded with dedicated foam pads to increase user comfort. Due to utilizing the latest materials and technology the plate carrier provides high durability and comfort whilst maintaining a low weight.

### TECHNICAL FEATURES

- Lightweight and durable
- One size fits most (SAPI Small, SAPI Medium, 10"x12")
- Quick and easily interchangeable plate carrier parts
- Low profile stretch elastic cummerbunds
- VELCRO® Surface for ID patch

PLATE CARRIER SHOWN WITH REAR UNI LOOP MODULES FITTED

# RAIDER

## PLATE CARRIER

### PRODUCT CONCEPT

The pre-configured Raider Plate Carrier is assembled with a hybrid laser-cut front and rear panel that utilizes classic PALS/MOLLE webbing. The front panel has a flat admin pocket for storing commonly used equipment. The RAIDER Placard is a classic webbing PALS/MOLLE front panel that allows mounting various pouches. The Placard is attached to the plate carrier with commonly used QASM buckles. Once detached, the Placard can be converted into a chest rig with the CLAWGEAR® Chest Rig Adapter.

The RAIDER cummerbunds provide a large and stable mounting surface while being lightweight due to their hybrid construction. Large cut-outs ensure good breathability and weight reduction. The cummerbunds have a sturdy QR buckle closure. The shoulder straps function alone and can also be adapted to use Quick Release or Uni Loop modules.

The plate carrier is designed as "one size fits most", therefore it can carry the most popular stand-alone ballistic plates. Furthermore, it can be upgraded with dedicated foam pads to increase user comfort. Due to utilizing the latest materials and technology, the plate carrier provides high functionality, durability, and comfort while maintaining a low weight.

### TECHNICAL FEATURES

- Lightweight and durable
- Integrated, flat admin pocket

# OPERATOR MAP

## MODULAR ASSUALT PACK

### PRODUCT CONCEPT

The Operator MAP was created to extend the carrying capacity of the CLAWGEAR® Plate Carriers. The construction consists of two main cargo spaces offering a variety of load possibilities. Additional PALS panels, located on the sides and front of the backpack, provide an optional platform for even greater expansion of the load capacity. The full-size, ergonomic, soft shoulder straps attached to the backpack, finished with a spacer mesh for greater comfort, also allow the user to carry the product independently.

To ensure a solid attachment to the vest, the backpack is fastened with two heavy-duty zippers on the sides and 4 small PALS straps in the central rear panel. These securely integrate the pack with the plate carrier's rear panel.

### TECHNICAL FEATURES

## PLATE CARRIER ACCESSORIES

### PRODUCT CONCEPT

01 The CLAWGEAR® Protector Cumberbund Insert is designed for the PROTECTOR elastic cummerbunds. The Protector Cumberbund inserts allow the user a quick and easy expanding storage solution. The inserts can hold a single or double rifle magazine, flashbang, medium-sized radio, or any other items similar in size. The content is secured with an adjustable/removable shock cord retainer. The Inserts can be rotated 180 degrees vertically, which means that the contents can be accessed either from the top or from the bottom. · Weight: 48g

02. The CLAWGEAR® Single Mag Insert is designed for the CLAWGEAR® Plate Carrier Placard. The Single Mag Insert holds a single AK/AR Rifle Magazine. The magazine is secured with an adjustable/removable retainer. The retention has an ergonomic pull tab for easier activation when either securing a magazine or clearing the mag for extraction. Three mag inserts can be added across the CLAWGEAR® Plate Carrier Placard. · Weight: 36g

03 The CLAWGEAR® Plate Carrier Placard is an innovative modular front panel that can be widely adjusted. Due to its unique design, it can be adjusted into a single or double-row placard. It can hold up to 3 x SR Magazines / 6 x Rifle Magazines in the one-row / two-row configuration · Weight: 215g

04. CLAWGEAR® offers a number of accessories and adapters for our plate carrier system. The Shoulder Straps QR Module is one of these. A set of adapters left and right, for the CLAWGEAR® Shoulder Straps add a Quick release buckle to the end of each plate carrier shoulder strap further enhancing the versatility of the system. · Weight: 78g/ set of 2 pieces

05. Supplied as an optional extra for all three plate carrier systems. The shoulder pads are a set of wrap-around laminate pads which secure around the shoulder strap and offer a solid and durable contact point on the shoulder. Additionally, they provide the ability to secure kit items that may pass over the shoulder, such as cables, for example, using two CLAWGEAR® universal loops on each side. · Weight: 58g/set of 2 pieces

## BACKPACK

### PRODUCT CONCEPT

Originally designed as a versatile utility pack this concept proved very versatile indeed. The original design has been reviewed and adapted for at least one special unit and further customisation has taken place for other specific load out requirements. It remains in development as end user needs are continually reviewed and further adaptations are made.

This particular new version has been simplified internally and yet enhanced externally. The interior has been refined to a clean robust design perfect for dynamic field use. It maintains the provision for a hydration bladder with drink tube exiting centre top of the pack. The padded back panel with internal HDPE stiffener are also retained. The exterior has undergone a number of subtle changes for both functionality and extra comfort.

The padded shoulder straps have been repositioned slightly to optimise user interface. The main zip has been extended permitting full clam shell opening. This allows unobstructed access and a working surface when the pack is lying fully open at 180 degrees. Two elastic topped pockets have been added to the sides of the pack permitting any number of items to be loaded externally. Durable laminate panels above with laser cut slots provide multiple fastening points to secure even longer items. The voluminous front pocket cavity behind the lower front pocket assembly also has durable laminate panels added above. Again, to secure any items which may protrude vertically beyond the pocket. Reinforced webbing loops remain on the base for even more fastening points with a view to provide as much versatility and usability to the end user as possible.

### TECHNICAL FEATURES

- YKK Zippers
- Stiffened carrying system
- Improved shoulder strap position
- Elasticated side pockets with compression straps
- Upper compression and retention straps
- Multiple retention points about the pack
- Laser cut MOLLE panels
- Double based with reinforced attachment loops
- Clam shell opening main compartment

### KEY TECHNOLOGIES

- Versatile load carriage
- Ergonomic carrying system
- H2O bladder compatible
- External laser cut PALS panels
- Waist belt and sternum strap compatible
- Weight: 1.4kg

### ENABLING TECHNOLOGIES

- Near Infrared Suppression
- 500/500D Cordura Laminate

# DEPLOYMENT BAGS

## PRODUCT CONCEPT

The CLAWGEAR® Deployment bags are a range of rugged bags designed to fulfill the deployment needs of our many valued service clients. Three sizes have been designed to provide a selection for specific end user needs. An array of features have been added many of which are obvious such as the large opening main compartments and end pockets, but others are more subtle such as the stowable shoulder straps amongst others.

100ltr Deployment bag. Our largest deployment bag. Classic form and feature packed. Includes two large external end pockets and one flat document pocket. Access to the voluminous interior is maximized by utilising a heavy duty YKK U shaped zip. The bag has a stiffened base for a more rigid form. It has identification windows placed at each end. It is provided with two transport handles, carry handles and an adjustable shoulder strap with comfort pad. Additionally it has ergonomically designed shoulder straps which stow into the main opening flap when not in use. This bag can therefore be worn as a back pack for more convenient and comfortable transport across greater distances. Consideration has also been made for euro pallet transport as this bags dimensions are L80cm x W40cm x H33cm.

70ltr Deployment bag. Our mid range deployment bag offers a great balance between capacity and weight when fully loaded. Offering all the features and user benefits of the 100ltr assignment bag including the rugged construction with top quality materials. Reinforced Cordura panels and strategically placed bartacks to ensure a good service life. The slightly smaller dimensions L70cm x W35cm x H30cm may arguably offer an even more comfortable fit when using the built in shoulder straps to wear this bag as a back pack.

40ltr deployment bag. When your larger deployment bag has been loaded into the hold of an aircraft the 40ltr deployment bag will be your carry on companion. Designed specifically with carry on in mind we have been able to fit a U shaped zip in this smaller format to provide the same ease of access. The clean lines have the same considered complement of handles arranged about the bag for easy user interaction. This bag is particularly convenient when used with the padded shoulder strap. Hanging at your side simply adjust the bag to height for easy access to the main compartment or the flat document pocket on the front.

## TECHNICAL FEATURES

- Multiple carry points
- Stowable Pack Back Straps
- Removeable shoulder strap
- Large opening with YKK Zip
- ID Windows each end
- Velcro panel for patches
- Chem Light loop as a marker

# BELTS

## ESSENTIALS INNER, OUTER, & SLEEVE BELTS

### PRODUCT CONCEPT

01. Designed to function both independently and additionally to stabilize the Outer Belts during use, the central core is reinforced with Tegrise composite. This makes the belt lightweight but stiff enough to wear a pistol holster on it. A simple Uniloop for fastening ensures countless variations of size for ultimate comfort. · Weight: 118g

02. A lightweight and even further simplified version of our Inner Belt offering end users another option to fulfill their varied tasks. The low profile and simple construction result in an easy-to-use comfortable belt. · Weight: 94g

03. By combining both an innovative construction technique and state-of-the-art materials, the Operator Outer Belt benefits from reduced weight and substantial stiffness. The stiffness contributes to its ability to carry various items of kit about its circumference using a PALS-compatible system. The belt is secured with a 25mm AUSTRALPIN COBRA® Buckle providing all the functionality and durability Cobra buckles are renowned for with little to no gain in weight. · Weight: 174g

04. The lightweight version of our Operator Outer Belt offers our customers another option to experience one of our belts. The lightweight belt offers all the durability and functionality of the standard Operator Outer Belt in the same format with the addition of a top-quality polymer buckle. The double lock buckle in 38mm width is color-coded, NIR-treated, and secure. · Weight: 139g

05 The Raider Outer Belt is designed with classic PALS webbing attachment in mind. The combination of modern materials including a composite Tegrise core provides substantial stiffness to the belt. Fastening with the latest 38mm AUSTRALPIN COBRA® Snakebite buckle makes size adjustment simple and convenient. · Weight: 198g

06 The Raider Outer Belt Light Weight combines all the fantastic design features and functionality of the Raider Outer Belt in a lightweight format. Including the same PALS attachment points and stiffness due to the reinforced Tegrise core · Weight: 151g

07. Specifically designed to fit through the new CLAWGEAR® sleeves, the Sleeve Belt consists of carefully considered layers of webbing, providing good rigidity as a stand-alone belt or when used as planned with a sleeve. The center front webbing is cleverly tapered to assist in fitting the belt through the various loops contained within the sleeve.  
· Weight: 209g

08. Supporting the CLAWGEAR® Sleeve Belt is the second version in this line, the Sleeve Belt Light Weight. 38g lighter than the original due to the use of a military-grade plastic buckle the Sleeve Belt LW maintains all the same functionality. · Weight: 171g

## ESSENTIALS 4 POINT HARNESSES & SLEEVES

### PRODUCT CONCEPT

01. The primary focus when designing our 4 Point Harnesses is to allow the end user the ability to comfortably distribute the weight of equipment between our belts and shoulder yokes. The minimalist design functions well as a stand-alone product and can also be used while wearing a backpack. The harness geometry, construction, and materials selection prioritize comfort and function. · Weight: 193g

02. A logical development of our padded 4 Point Harness is our 4 Point Harness Light Weight, combining all the features and functions, of our Padded 4 Point Harness in lightweight and durable laminate construction. The harnesses low profile allows it to be worn under a plate carrier, attaching to any of our CLAWGEAR® Sleeves, providing enhanced load carriage capabilities whilst maintaining comfortable load distribution across both products. · Weight: 150g

03. The Operator Sleeve is a very minimalist yet highly functional product from the CLAWGEAR® design team. It is designed to carry equipment. The construction and use of CORDURA® laminate results in the low profile and low weight of the sleeve. The sleeve size functions in conjunction with a CLAWGEAR® belt of the same size. A CLAWGEAR® sleeve belt for example would be passed through the length of the sleeve providing a fastening belt within the sleeve. The sleeve has a mounting system for PALS-compatible kits such as pouches and accessories. Additional vertical cuts allow a holster to be mounted through the sleeve and onto a sleeve belt, for example, passed through the sleeve. The inner Velcro hook allows the sleeve to be secured directly to one of our inner belts, thus up to 3 components may be used together. The detachable anti-slip panels can be used to cover the Velcro if no inner belt is used. · Weight: 205g

04. The Raider Sleeve has been designed as a universal belt-based system for carrying equipment. Despite the conventional construction, based on polyamide webbing, it has been integrated with a 500/500D CORDURA® laminate, further enhancing its durability and function. The laser-cut laminate facilitates the use of the CLAWGEAR® 4 Point Harnesses to distribute a load between the shoulders and the waist to the user's preference. Much consideration has been invested in ensuring a maximum range of PALS cells across the Sleeve. This combined with foam padding strikes a balance between comfort and versatility.

The Sleeve is profiled in such a way as to harmonize with the anatomy and distribute the weight of the carried equipment in an optimal way. The design allows it to be worn both in combination with an inner belt attached by Velcro or with a sleeve belt over clothing, which will not be damaged thanks to the protective Velcro covers.

# MAG POUCHES

## BACKWARD FLAP

### PRODUCT CONCEPT

01. The Backward Flap Magazine Pouches are characterized by an unusual approach to the ergonomics of magazine extraction from a secure position in the magazine pouch. The unique design allows magazines to be drawn from both open and closed positions. The elastic shock cord maintains them under compression, holding them securely, and eliminating the possibility of them falling out of the magazine pouch.

- Weight: 48g
- Fits most 9mm double stack standard-sized magazines

02. Transitioning from a securely closed rifle pouch to an open pouch is fast and intuitive. The open pouch offers absolutely no restriction to drawing the magazine, essential if a rapid reload is required. The end user can also adjust the shock cord with a cord lock to personalize the tension it requires to open the magazine pouch.

- Weight: 93g
- AR15 STANAG Compatible
- AR15 PMAG Compatible
- Steyr AUG Compatible

03. The Backward Flap SR Magazine Pouch offers the unique opening properties of the new magazine pouches for larger magazine formats in the 7.62 x 51mm NATO range.

- Weight: 100g
- AR10/SR25 Compatible

# QD ACCESSORIES

## 01. & 02. M-LOK AND PICATINNY QD MOUNT

Mounting points are available for the M-Lok system and also for Picatinnyrails, which can be seen as the industry standard. The body of these are all made from steel to ensure durability and ruggedness. On the M-Lok variant the mounting nuts are also stainless steel, which are also used in the pic rails from CLAWGEAR®. Bevelled edges and a low profile design minimises the risk of snagging and damaging gear or equipment.

Two variants are available, a rotation or anti rotation model, depending on the user preference. The standard model allows the sling to rotate freely 360 degrees. On the anti rotation model the orientation of the swivel can be timed in 45 degree positions, to setup the alignment of the slinge.

### FEATURES M-LOK QD MOUNT

- Body made of steel with a black finish for corrosion resistance
- Mounting point for QD swivels
- Available in different versions: anti-rotation or standard
- Low profile design to reduce snagging
- Stainless steel T-Nuts to avoid corrosion. No coating that can wear off or chip away when mounted and dismantled several times (on the M-Lok variants)

## 03. SLING SWIVELS (QD SLING SWIVELS)

This QD push button design is the male counterpart which is mounted to the rifle sling. It allows to mount and dismount the sling with one hand in seconds. To avoid accidental dismounting, the push button does not protrude from the body. Made from stainless steel to avoid corrosion, the body and loop are black coated to reduce glare. Different versions are available, 1 inch and 1.25 inch depending on the width of the webbing and a triangle shaped which can be use with a paracord loop.

### FEATURES

- Body and Plunger made from stainless steel
- Chrome stainless steel ball bearings
- Black oxide finish achieving a highly abrasion resistant surface
- Recessed plunger to prevent accidental release and minimize snagging on gear
- Available in 1.00 inch and 1.25 inch Version for different webbing and with a triangle shaped swivel for use with paracord

# GUN ACCESSORIES

## PICATINNY RAIL

To mount all sort of accessories to the widely adopted M-Lok interface, Picatinny rails are one of the most versatile parts. Offered in different lengths with 3,5,7 or 9 slots to provide space for different attachments. The short 3 slot section is ideal for a flashlight or small accessories that do not require many rail slots. With a length of just 1.5 inches (38,1mm) and requiring only one 1 M-Lok slot this is the smallest rail offered. Rails sections with more slots, for bigger accessories like vertical grips, laser units or remote switches depending on the needed length. A special pic rail with 10 slots and a QD interface, allows to mount a bipod or vertical grip and a sling on the same rail without adding unnecessary bulk or weight. Machined from aluminium and bevelled edges on the ends to minimise the risk of snagging on gear. The anodised finish aids in durability and ruggedness. A matt finish reduce glare and without being overly aggressive. All rail accessories feature stainless steel nuts avoid the possibility of corrosion, with no coating that can be worn off after repeated mounting and dismounting.

### FEATURES

- Picatinny Accessory Rail for M-LOK interface with 3,5,7 or 9 slots
- Special model with 10 slots and QD the attachment point is also available
- Made from high-strength aluminum and a durable hard coat anodized finish, that meets MIL-SPEC requirements
- Mounting hardware included (nuts and screws), with stainless steel T-Nuts to avoid corrosion
- No the coating that can wear off or chip away when mounted and dismounted several times

## M-LOK T-NUT REPLACEMENT SET

Spare mounting hardware for all kind of M-LOK Accessoires. The set countains of two M-LOK Nuts and two screw pairs in different length, depending on the tickness of the Accessoire.

### FEATURES

- Stainless M-Lok Nuts
- Screws in different lengths

## FLIP UP SIGHTS

The CLAWGEAR® Flip Up Sights was designed to be a fully functional iron sight, fitting on 1913 Picatinny rails, it is not specific to a certain gun model. May it be your main sighting system on your rifle or to provide a backup in case your main optic failed. Foldable so it can be stored in a low profile out of sight when not needed, the full metal construction with black finish provides durability. Toolless adjustable so zeroing can be done by hand fast and easy on the range. The front sight is adjustable for elevation while the rear is adjustable for windage. This sight is available as a set and individual so the front and rear sight can be combined with many other iron sights that are available.

The CLAWGEAR® Flip Up Sights are currently used by the Austrian BMI / Police as the standard issued backup iron sight.

### FEATURES

- Fit MIL-STD-1913 Picatinny / STANAG 4694 Rails
- Low profile/foldable when not in use
- Hardened and non-reflective coating
- Durable metal construction
- Tool-free adjustable front elevation and rear windage

## 9MM PISTOL SUPPRESSOR

The CLAWGEAR® Pistol Suppressor was developed for 9mm semi-automatic pistols, with the capability to be serviced by the end user. Outfitted with a booster/Nielsen device to ensure a reliable function with a wide range of ammunition, especially when used with subsonic ammunition. Made out of aluminium with a stainless-steel blast baffle to ensure a long service life. The suppressor can be rotated/timed while being mounted to correct a point of impact shift. For disassembly and cleaning the piston is designed to unscrew the endcap to remove the baffle stack.

### FEATURES

- Aluminium construction with stainless steel blast baffle
- Easy cleaning due to disassembly option
- POI shift can be corrected while mounted
- Diameter 37mm length total 200mm/ added length when mounted 192mm
- Piston is the disassembly tool
- Made in Austria

### PARTS

- 01 - Endcap
- 02 - Aluminium Baffle
- 03 - Stainless Steel Blast Baffle
- 04 - Piston (Disassembly Tool)
- 05 - Spring

### DETAILS

- Caliber 9x19
- Thread: M13,5 x 1 LH (Others on request)
- Weight: 375 g

## 5.56 EXTENDED MAGAZINE BASE

The CLAWGEAR® Magazine Base Extension fits on the 5.56 PMag 10 AR/M4 3rd Generation. When installed, the capacity will not be increased, only the overall dimension of a 30 Round Magazine will be represented. Mag changes, gripping, and overall handling will be enhanced. Produced from high-quality polymer and Made in Austria.

### FEATURES

- Compatible with 5.56 PMag 10 AR/M4 3rd Generation
- No permanent modification to the magazine
- Durable polymer construction
- Made in Austria

### WEIGHT

62 g

### LENGTH

• L: 70 mm, W: 31 mm, H: 106 mm

# MUZZLE DEVICES

With the Starblast line there is an additional muzzle device line offered by CLAWGEAR® This models are made in Austria. All models feature the Nato A2 interface for mounting a suppressor. On the Aug variant there is no counter nut used, making it ideal when used with a suppressor.

## STARBLAST FLASHIDER

The Starblast Flashider is designed to minimise the muzzle flash, reducing the signature in low light conditions. Most effective on short barrel rifles where the muzzle flash effect is more notable. For this models variant for the AR15, AK47, AUG will be available, as well for AR10 rifles in 7.62x51. With the 300 BLK becoming more popular, the AR 10 variant can also be used on this rifle.

Newest model of the CLAWGEAR® muzzle devices. Flutes on the outside for weight reduction and wrench flats machined into the sides of the adapter allow for easier installation. The Starblast Flashider delivers the performance and durability you can trust. The minimalistic design gives your rifle a cool look from butt to tip.

### COMPATIBILITY

- Steyr AUG (M13x1 LH)
- AR15 (1/2" - 28 UNEF)
- AK47 (M14x1 LH)
- AR10 (5/8" - 24 UNEF)

### DETAILS

- Weight: 81 g

### DIMENSIONS

- L: 59 mm, ø 21,93 mm

## STARBLAST COMPENSATOR

The Starblast Comp is a hybrid design of a muzzle brake and compensator. Offering a good combination of recoil reduction and muzzle rise. Available for the AR15, AK47 and AUG rifles.

Outfitted with the Nato A2 standard interface to provide the option to mount any suppressor or blast deflector with the NATO QD mount (B&T Rotex V, Steyr UMS, or the Blast Deflector from B&T). Mounting grooves allow the compensator be timed on any AK based weapon system. Special design for the Aug variant there is no counter nut used, making it ideal when used with a suppressor. Included crush washer for the AR15 model.

### COMPATIBILITY

- Steyr AUG (M13x1 LH)
- AR15 (1/2" - 28 UNEF)
- AK47 (M14x1 LH)

### DETAILS

- Weight: 82 g

### DIMENSIONS

- L: 59 mm, ø 21,93 mm

# MUZZLE DEVICES

## TWO CHAMBER COMPENSATOR

The Two Chamber Comp is a classic muzzle break, with the focus on reducing the recoil. Directing the muzzle blast to the side giving it effectiveness, which is most notable when shooting 2 or 3 round fast. One downside to this is the concussion and noise to the side, what can be noted by the person standing close to the shooter.

### TWO CHAMBER BREAK

Two chamber break for maximum recoil reduction.

### CLOSED BOTTOM

Prevents blown-up dust and debris.

### COMPATIBILITY

- Steyr AUG (M13x1 LH)
- AR15 (1/2" - 28 UNEF)
- AK47 (M14x1 LH)

### DETAILS

- Weight: 85 g
- L: 59 mm, ø 21,93 mm

## BLAST FORWARD COMPENSATOR

The Blast Forward Compensator is a linear type of compensator. Due to the design of the inside construction the muzzle blast is guided straight forward. This decreases the user's exposure to noise, exhaust gases and powder particles as well the muzzle blast.

### 3 EXPANSION CHAMBERS

The construction guides the exhaust gases in the optimal direction to reduce recoil and muzzle flips.

### BREACHER SPIKES

These hardened steel spikes allow the user to destroy barriers in CQB situations. They can also be used as a fastening point with the included tool.

### CLOSED BODY

Forwards exhaust gases and noise away from the user

### COMPATIBILITY

- Steyr AUG (M13x1 LH)
- AR15 (1/2" - 28 UNEF)
- AK47 (M14x1 LH)

### DETAILS

- Weight: 82 g
- L: 50 mm, ø 30 mm

## SOF COMPENSATOR

The SOF Compensator models are focused on reducing muzzle rise when doing fast follow up shots. A closed bottom design prevents blown up dust from the ground when shooting in a prone position, so the signature when shooting is reduced. On the AK variant there are slots on the outside, due to the mounting system that is used on the AK platform.

### FEATURES

- BREACHER SPIKES - These sharp and hardened steel spikes allow the user to destroy barriers in CQB situations.
- EXPANSION CHAMBER - The construction guides the exhaust gases in the optimal direction to reduce recoil and muzzle flips.
- CLOSED BOTTOM - Prevents blown-up dust and debris.

### COMPATIBILITY

AR15 - Included Crush Washer ensures the correct timing of the muzzle device.

AUG - The included counter nut ensures the correct timing of the muzzle device

AK - Mounting grooves for the AK47 interface to ensure correct timing

- Steyr AUG (M13x1 LH)
- AR15 (1/2" - 28 UNEF)
- AK47 (M14x1 LH)

### DETAILS

- Weight: 85 g
- L: 59 mm,  $\varnothing$  21,93 mm

# AUG GUN PARTS

As the AUG is a trusted and proven weapon, with its iconic design and a long service history, good things still can be improved. Upgrading the AUG with parts from CLAWGEAR®, to add modern features and capabilities to this weapon system and bring it to the 21th Century. Used by professionals in the Military and Law Enforcement as well by civilian end users.

## AUG HANDGUARD

CLAWGEAR® brings a versatile and lightweight low-profile handguard to the Steyr AUG and at the same time also introduces the M-LOK platform to this weapon system. Sophistically engineered and fully field tested for uncompromising fight ability and operator-friendliness. Solid one-piece construction, made of hard-coated aluminum (Mil-8625-F type III, class II) for the perfect combination of low weight and highest mechanical stability. The AUG M-LOK handguard features 11 holes for limitless versatility and does not interfere with most silencers and muzzle devices.

As the AUG is a trusted and proven weapon, with its iconic design and a long service history, good things still can be improved. Upgrading the AUG with parts from ClawGear, to add modern features and capabilities to this weapon system and bring it to the 21th Century. Used by professionals in the Military and Law Enforcement as well by civilian end users.

### COMPATIBILITY

- Steyr AUG A1/A2
- AUG A3 SF
- AUG P, AUG Z
- AUG LMG variants
- AUG SA variants
- MSAR STG-556

**Does not fit AUG A3, AUG Z A3, AUG 9mm variants!**

### DETAILS

- Weight: 142 g
- L: 138,4mm, H: 47 mm, W: 56mm

## AUG HEATSHIELD

Optional accessories for the AUG Handguard, to cover up the gasblock and gasvent. This parts can get hot when shooting longer strings of fire in a short time. The heat shield covers this parts and prevents accidental touching, in dynamic or stressful situations. Mounted to the handguard with the M-Lok system, it can be easy removed for cleaning the gasblock and gasvent.

### FEATURES

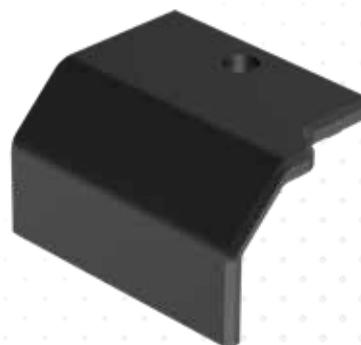

- Made of high-strength aluminum with Mil-Spec Type III hard coat anodized finish
- M-Lok mounting system

### COMPATIBILITY

- CLAWGEAR® AUG HANDGUARD

### DETAILS

- Weight: 20 g
- H: 41 mm, W: 45 mm

## AUG A3 TOP RAIL

The AUG top rail from CLAWGEAR® as a replacement for the OEM rail. Made from aluminum and coated with a black Mil-Spec Type III hard coat anodized finish. Full length 30 Slot picatinny rail for mounting optics such as LPVO's, Reddets or Holographic sights. Numbered slots to remount accessories on the same position (Laser units, Lights or Optics) The QD interface for the widely used QD Sling swivel is anti-rotational, to prevent tangling up the sling. For ideal fit the use of the CLAWGEAR® QD sling swivel is recommended.

### FEATURES

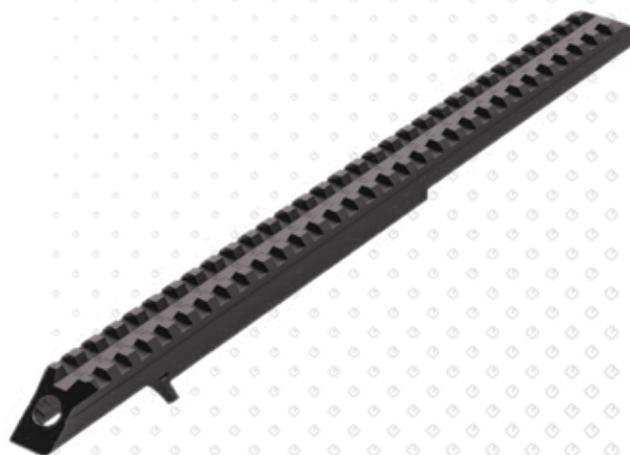

- Made of high-strength aluminum with Mil-Spec Type III hard coat anodized finish
- Features a non-glare coating to reduce reflections
- Makes the A3 rifle compatible with the Clawgear AUG Handguard
- Features a 30-slot Picatinny rail (NATO STANAG 4694)
- Anti-rotational QD attachment point at the front

### COMPATIBILITY

- AUG A3 Receiver (Flat Top Receiver)

### DETAILS

- Weight: 137 g
- L: 344 mm, H: 21,4 mm, W: 21,2 mm

## AUG QD SLING MOUNT

Secure mounting points on the rifle for slings that are outfitted with QD Sling swivels. This set includes a front and rear attachment point for the rifle. Made from steel to provide durability and coated with a black surface treatment. The conical shape and round design make it snag free and prevent damaging your gear or injures on the user. For best fit with the QD mounting points, the use of the CLAWGEAR® Sling Swivels is recommended.

### FEATURES

- Quick Detach Adapter
- Hardened and non-reflective coating
- Durable metal construction

### COMPATIBILITY

- Steyr AUG A1/A2
- AUG A3
- AUG A3 SF
- AUG P
- AUG Z
- AUG LMG variants
- AUG SA variants
- F88 Austeyr
- MSAR STG-556

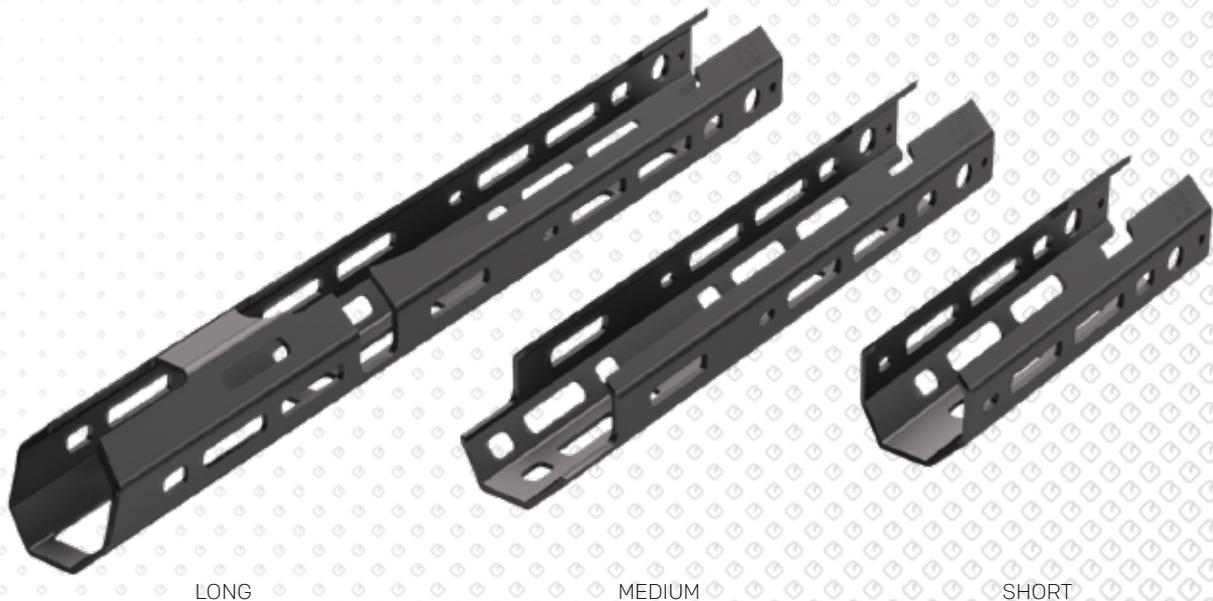

### DETAILS

- Weight: 137 g
- H: 12 mm, ø22mm

# AK GUN PARTS

The CLAWGEAR® accessories for the AK Platform are designed to fit on this widely used platform. Because of the many different manufacturers, with different build quality and tolerances, there is always the possibility of necessary modifications for fitment or incompatibility of parts.

## AK SLICK HANDGUARDS

The CLAWGEAR® Slick handguard is available in three different sizes. Short, Medium and Long depending on user preferences. They all feature M-LOK interface to give the possibility to mount any M-LOK compatible accessories, like vertical grips, Picatinny rails, QD interfaces for slings or illumination tools such as white lights or infrared illuminators. On the left and right rear side of the handguard there are QD sling attachment points. They are compatible with the common QD sling swivels, for perfect fit the use of the CLAWGEAR® QD sling swivels is recommended. Made from an aluminium extrusion for a lightweight and durable handguard. The surface is black anodized with a matt finish to prevent light reflections and offer a good grip.

### FEATURES

- Matte black non-glare surface coating to reduce reflections
- QD sling attachment point on the rear side of the handguard
- M-LOK mounting system to fit all types of M-LOK accessories: rails, vertical grips, AFG, ...
- Fits a wide variety of AK 47's with stamped and milled receivers
- Lightweight construction made out of high-strength aluminum with MIL-SPEC type III hard-coat anodized finish

### DETAILS

- LONG: Weight: 292 g, Length: 383 mm
- MEDIUM: Weight: 250 g, Length: 262 mm
- SHORT: Weight: 160 g, Length: 160 mm

## AK47 GAS TUBE COVER

Upgrade part that works only with the CG slick handguard models. Made out of an aluminium extrusion with a matt black anodized finish. The Picatinny rail on top give the option to mount a light or IR illuminator.

### FEATURES

- Upgrade part for the CLAWGEAR® AK 47 slick handguard
- Mil-STD 1913 Picatinny / Stanag 4694 rail on top
- Made from high-strength aluminum with black mil-spec hard coating

### DETAILS

- Weight: 80 g
- L: 100 mm, W: 34,6 mm, H: 37,5 mm

## AK-47 REAR SIGHT MOUNT

This replacement for the standard AK rear sight fits on all variants of the mauser style adjustable rear sight. The nine slot picatinny rail allows to mount optical sights such as red dots, holographic sights or compact LPVOs to upgrade the weapon system. In case the mounted optic fails, an integrated emergency backup sight is machined into the base of the rail. The adjustment screw allows the backup sight to be zeroed to the desired distance. Changing out the original rear sight and replace it with the RSM from ClawGear is a non-permanent modification and can be done with basic tools.

### FEATURES

- NATO STANAG 4694 Rail: Nine-slot Picatinny to upgrade the rifle with aiming devices or other accessories.
- Emergency Iron Sight: Integrated rear sight
- Adjustment Screw: Allows to zero the backup rear sight
- Compatible: AK-47, AKM, RPK, AK-74, and all variants with the original Mauser-type adjustable rear sight.

### DETAILS

- Weight: 55 g
- L: 110 mm, W: 19,7 mm, H: 21,2 mm

## AK PISTOL GRIP

Simple upgrade to the standard wood grip. Injection moulded fiberglass reinforced pistol grip with a storage compartment, ideal for small tools, batteries, or other useful parts. The lid can be removed without tools for easy access. Fits on AK47 and 74 rifles and variants that share the same AK pattern grip. Mounting hardware with a stainless-steel bolt is included

### FEATURES

- Fits on AK47 und 74 Rifles
- Made of durable Polymer
- Internal Storage Compartment

### DETAILS

- Weight: 66 g
- L: 93 mm, W: 31 mm, H: 107 mm

 CLAWGEAR

# DEALER REQUEST

## HOW TO BECOME A DEALER

Selected retailers profit from attractive wholesale conditions. To start the process of becoming a registered dealer with us, please complete our online dealer application form at: **clawgear.com**  
Describe your business activity in detail as this is an important decision criterion for setting up an account.

A wholesale account is only available for retailers with appropriate infrastructure (brick-and-mortar shop or well-organized webshop) and authorization by the local authorities. Business activity has to be pursued full-time, and the product line must contain quality goods that are largely available from stock. We do not sell to any dealers conducting business out of their residences. Associations, martial arts schools and gyms, security companies, event and course organizers, drop shipment businesses, surplus dealers and other unrelated industries don't qualify for a wholesale account. Authorized retailers must be able to maintain competent advice to customers and aftersales services including technical first-level support.

## APPLICATION PROCESS

You can apply for your dealer account in just a few steps:

**01** Visit our website.

**02** Choose your country at the very top of the page.

**03** Click the „DEALER AREA“ button on the right side of the navigation bar.

**04** Fill out the „DEALER APPLICATION FORM“ online.

**05** Get a response as soon as possible.

# SIZE CHART

## HOW TO MEASURE CORRECTLY

Take care to make all your measurements close-fitting. Dimensions are in cm, length of the pants is also in inches. The figures show your own body measurements. For the most recent version of our size chart, please check our website.

### A CHEST SIZE / CIRCUMFERENCE

Circumference of the chest at armpit height. (See Fig. 01)

### B SLEEVE LENGTH

With arms slightly bent, measure from the shoulder joint along the outside length of the arm to the wrist. (See Fig. 01)

### C WAIST SIZE / CIRCUMFERENCE

Circumference of the waist below the navel. (See Fig. 01)

### D INSEAM / LEG LENGTH

Measure from your crotch to your ankle. (See Fig. 01)

### E HEAD CIRCUMFERENCE

Measure around your head with a tape measure. (See Fig. 01)

### F HAND CIRCUMFERENCE

Measure around your hand with a tape measure. (See Fig. 02)

### G HIPS WIDTH

Circumference of the hip on the widest part of the hip and bottom area. (See Fig. 01)

Fig. 01

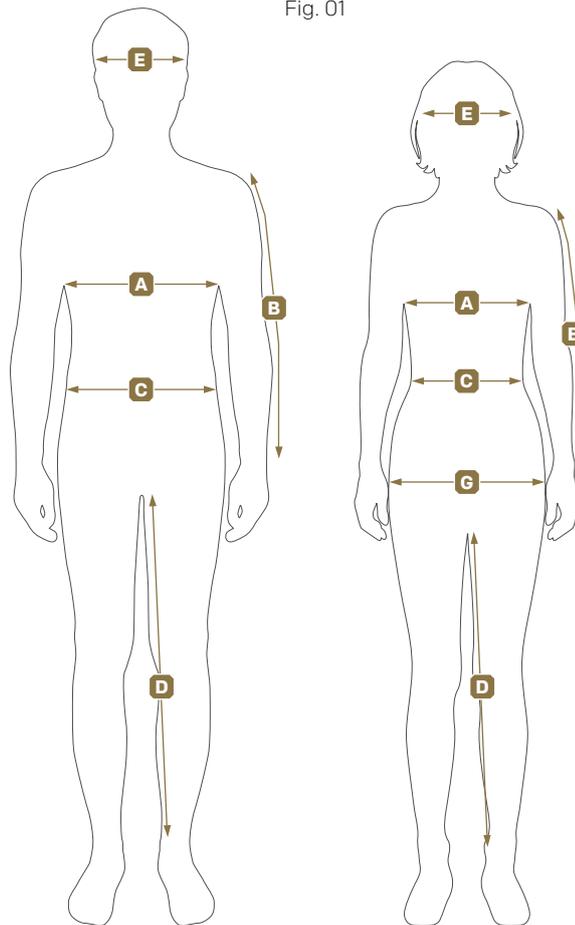

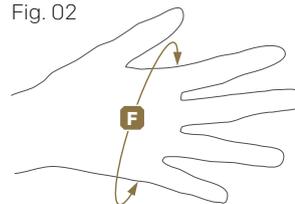

Fig. 02
